**JOB POSTING**

**PROCESS ENGINEER**

**LOCATION:** Pavilion, BC

**COMMENTS ON IMMIGRATION:** If you are applying for a position in another country, please note that the position and your application will have to be considered from an immigration perspective.

**POSITION SUMMARY:**

The Process Engineer is responsible for lime kiln process and associated production units. The process engineer will identify and implement the development of processes, procedures, and tools associated with the kiln process to reduce production cost and improve efficiency while producing quality products.

**DUTIES AND RESPONSIBILITIES:**

- This position provides technical support to all plant functions.
- The position is an ideal fit for an ambitious self-starter who wants to learn or expand skills in all areas of the plant operation and advance into other positions within Graymont.
- Strong communication skills are critical to the success of this position. The successful candidate will communicate across plant function lines as well as non-plant resources to ensure “best” solutions and engineering practices are implemented.
- Provide in-house process and project engineering support to maintenance and operations.
- Define PI data tags to help identify, analyze and implement process improvement opportunities.
- Coordinate maintenance and production activities associated with long and short term shutdowns.
- Develop, manage and implement capital projects and major repairs with plant personnel.
- Coordinate and supervise work provided by contractors and vendors.
- Assist the operation and maintenance in determining the root cause of problems causing equipment failure and develop corrective solutions.
- Function as a relief supervisor to assist with coverage for supervisory staff.
- This position may be required to manage/supervise quarry operations.
- Perform “on-call” duties on rotation with the management team. Participation in day-to-day plant environmental compliance and reporting.
- Work with Maintenance Supervisor in managing inventory, JDE Reports, Work Order system.

# GRAYMONT

- Ensure that the highest standards are achieved in the areas of safety, environmental compliance and process efficiency and reliability.
- Take an active role in the plant safety committee.

## **QUALIFICATIONS:**

- Proven track record of developing and maintaining a safe work culture.
- Proven teambuilding and leadership skills.
- BS Degree in Engineering or an equivalent combination of education and experience.
- Industrial experience a plus.
- Must be willing to work extended hours as necessary to meet deadlines or to ensure resolution of plant problems.
- Passionate in the pursuit of implementing process improvements.
- Strong computer skills. PI data, PLC programming and or JDE experience is a plus.
- Basic financial management skills (analysis, budgeting, and planning).
